

# Nutrition Detector and Comparator

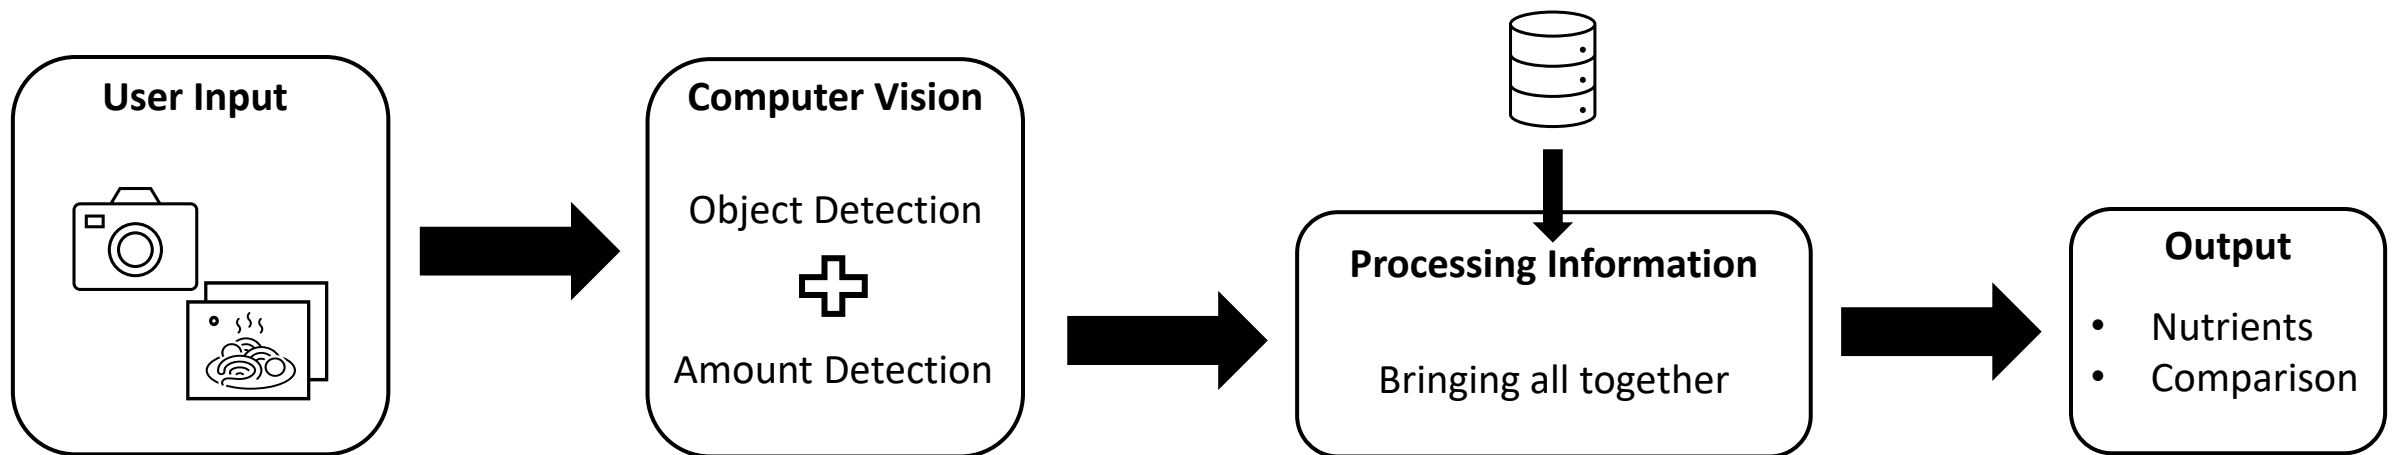

Project Proposal by:

Shaduan Babbili

Numan Tok

# Vision & Architecture

- Comparing nutrients of different meals by just taking pictures
- For everyone interested in a healthy lifestyle
- Existing solutions:
  - Manual food tracking
  - Start-up with similar idea but additional hardware needed

# Challenges / Risk

?

How can we extract information about the amount of ingredients?  
→ Computer vision specialist could be needed as a team member
